## Drinks Sustainability Tool

Version: 1.1

Date: 2025-07-18

Author: Replit Coach Too

Status: Draft

### 1. Introduction

This document provides a hierarchical sitemap for the 'Drinks Sustainability Tool'. It outlines the complete structure of the application, including public-facing pages, the core private application, and the separate supplier portal.

### 2. Public-Facing Site

This section covers all pages accessible to the general public without authentication. This site is designed to educate potential clients, build trust, and drive conversions.

- **/ (Homepage)**
- **/services** (A detailed breakdown of the platform's features and the problems they solve)
- **/pricing** (A clear and transparent overview of the tiered, revenue-based pricing model)
- **/about-us** (The story behind Avallen Solutions, its mission, and the team)
- **/case-studies** (A page listing in-depth success stories from clients)
  - **/case-studies/[case-study-slug]** (A dynamic page for each individual case study)
- **/testimonials** (A page dedicated to showcasing positive feedback and quotes from happy clients)
- **/blog** (Main blog page listing all articles)
  - **/blog/[article-slug]** (A dynamic page for individual blog posts)
- **/login** (Authentication page, handled by Replit Auth)

### 3. Core Application (Requires Authentication)

This section outlines the main pages of the platform accessible only to logged-in clients. All these pages will be rendered within the main application layout (with the sidebar and header).

- **/app/onboarding** (The initial guided setup flow for new users)
- **/app/dashboard** (The main dashboard view)
- **/app/reports** (Page for viewing and managing generated LCA reports)
- **/app/suppliers** (Page for managing and tracking data requests to contract

manufacturers)

- **/app/settings** (Page for managing user profile, company info, and billing)

#### **4. Supplier Portal**

This is a distinct and simplified flow for third-party suppliers to submit their data. It does not use the core application layout.

- **/supplier-portal/[unique-token]** (A unique, secure link emailed to the supplier that leads them to the data submission form)
