Company Story

Mission Statement

We're on a mission to revolutionize how the beverage industry thinks about sustainability, one sip at a time. Our team is building an innovative app that empowers drinks companies—from craft breweries to juice producers—to track, measure, and dramatically improve their environmental impact. We believe that every bottle, can, and glass matters, which is why we're creating tools that make it simple for businesses to monitor their carbon footprint, optimize their supply chains, and connect with eco-conscious consumers who share their values. This isn't just about compliance or checking boxes; it's about helping passionate beverage makers transform their operations into forces for positive change while maintaining the quality and innovation that makes their products extraordinary.

Strategic Pillars

Key Sustainability Metrics

1,132.3

tonnes CO2e

27.9M

litres water

10.8

tonnes waste

Carbon Footprint Analysis

381.9

Scope 1+2 (tonnes CO₂e) Direct + Energy emissions 750.4

Scope 3 (tonnes CO₂e)
Value chain emissions

1132.3

Total (tonnes CO₂e)
Complete footprint

Detailed Breakdown

INGREDIENTS

Raw materials and agricultural inputs

596.8 t CO₂e

OpenLCA ecoinvent database

PRODUCTION FACILITIES

Energy, gas, and operational emissions

381.9 t CO₂e

Scope 1+2 Direct & Indirect emissions

PACKAGING MATERIALS

Glass bottles, labels, closures with recycled content

113.7 t CO₂e

Comprehensive LCA product breakdown

TRANSPORT & OTHER

Business travel, employee commuting, and transportation

39.6 t CO₂e

Scope 3 Travel & Transportation categories

WASTE

0.4 t CO₂e

Waste disposal and end-of-life treatment

Scope 3 Waste Generated category

Total Carbon Footprint

1132.3 tonnes CO2e

Sustainability Initiatives

Our strategic SMART goals driving environmental and social impact.

3

Completed

Active

Planned

Overdue

Reduce Carbon Emissions by 25%

ACTIVE

Achieve a 25% reduction in total carbon emissions compared to 2024 baseline

SMART Criteria

Specific: null Measurable: null

Achievable: null Relevant: null

Time-bound: null

Implement Water Recycling System

ACTIVE

Install advanced water treatment and recycling system to reduce water consumption by 30%

SMART Criteria

Specific: null Measurable: null

Achievable: null Relevant: null

Time-bound: null

Achieve 100% Renewable Energy

ACTIVE

Transition all facility operations to renewable energy sources

SMART Criteria
